results. The pilots he has trained have lots of respect for Capt. Muktadier's knowledge and his training style made them feel relaxed during the entire simulator session maximizing their learning due to his teaching ability, honesty and integrity. They have all commented that he is a true professional instructor and TRE. This is his second book that he has published. The first one was Boeing 727 Flight Master which received many outstanding and excellent reviews and positive feedback from the professionals in the airline industry who read the book and it soon became one of the best training books on

Since its first flight on 27 April 2005, the Airbus A380 has been the largest passenger airliner in the world. Instantly recognizable with its full-length upper deck, it represents the pinnacle of modern airliner design. Flying the A380 gives a pilot's eye view of what it is like to fly this mighty machine. It takes the reader on a trip from London to Dubai as the flight crew see it, from pre-flight planning, through all the phases of the flight to shut-down at the parking stand many thousands of miles from the departure point.

color to take advantage of the increased learning potential in the use of color. There can be no doubt that the Airbus A320 is a color driven systems airplane and this book attempts to take full advantage of the use of color in describing and illustrating the operations of the airplane systems and controls. Whatever price penalty is incurred in the purchasing of this color volume is well worth the investment in increased learning potential.
