Sometimes there are challenges for lactation therapists that can't be completely resolved by current lactation practices--when the baby has reflux or torticollis, when mother and baby are injured or in pain, when the mother can't relax enough to sleep, when weeks of pumping erode the mother's energy to the point she wants to quit breastfeeding. In *Complementary and Alternative Medicine in Breastfeeding Therapy*, author Nikki Lee describes mother-baby situations that benefit from complementary and alternative therapy techniques in order to have a thriving baby and a happy mother, with an abundant milk supply and easy breastfeeding. In her experience complementary therapies, when used in conjunction with proven breastfeeding management, do no harm and usually help mother and baby. Therapies covered include: -Creating a healing environment -Skin-to-skin and massage -Acupuncture -Chiropractic -Craniosacral therapy -Remedial co-bathing -Homeopathy This book is not an instruction manual. It is an open door to the world of other ways of healing. Some or all of these therapies may be gentle and helpful additions to your lactation toolbox.

The connoisseur's guide to the typewriter, entertaining and practical What do thousands of kids, makers, poets, artists, steampunks, hipsters, activists, and musicians have in common? They love typewriters—the magical, mechanical contraptions that are enjoying a surprising second life in the 21st century, striking a blow for self-reliance, privacy, and coherence against dependency, surveillance, and disintegration. The *Typewriter Revolution* documents the movement and provides practical advice on how to choose a typewriter, how to care for it, and what to do with it—from National Novel Writing Month to letter-writing socials, from

Are you or someone you know in the midst of grief? When I was dealing with the death of my wife I found it difficult to read narrative. Books and study guides on grief seemed difficult and impersonal. Most days I barely had enough energy to function. I desired encouragement and found it in daily devotions or personal accounts of how others dealt with this journey. I chose poems for this book because they can be digested in small bites and hopefully are helpful for the hurting heart.

Here is a new text that fulfills an emerging need in both higher and public education and stands to break new ground in addressing critical skills required of graduates. When working on their last book, *It Works for Me, Creatively*, the authors realized that the future belongs to the right-brained. While

Daniel Pink and other visionaries may have oversimplified a bit, higher education is ripe for the creative campus, while secondary education is desperately seeking a complement to the growing assessment/teach-to-the-test mentality. You don't have to study the 2010 IBM survey of prominent American CEOs to know that the number one skill business wants is students who can think creatively. To meet the demand of new courses, programs, and curricula, the authors have developed a 200-page "textbook" suitable for secondary or higher education courses that are jumping on this bandwagon. Introduction to Applied Creative Thinking, as the title suggests, focuses not on just developing the skills necessary for creative thinking, but on having students apply those skills; after all, true creative thinking demands making something that is both novel and useful. Such a book may also be used successfully by professional developers in business and education. For this book, Hal Blythe and Charlie Sweet are joined in authorship by Rusty Carpenter. He not only directs Eastern Kentucky University's Noel Studio for Academic Creativity but has co-edited a book on that subject, Higher Education, Emerging Technologies, and Community Partnerships (2011) and the forthcoming Cases on Higher Education Spaces (2012). Introduction to Applied Creative Thinking is student-friendly. Every chapter is laced with exercises, assignments, summaries, and generative spaces.
