other personal financial services players are investing heavily. But the market is changing fast. Going forward, players therefore need to adapt their strategies to the new realities: what worked in the past will not, for the most part, be appropriate in the future. This unique

book, written by a former McKinsey consultant, offers an up-to-date, detailed, practical understanding of this exciting area of financial services.

This book presents theories and case studies for corporations in developed nations,

including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese

The primary purpose of the Manual of Classification of Motor Vehicle Traffic Accidents is to promote uniformity and comparability of motor vehicle traffic accident statistics now being developed in Federal, state and local jurisdictions.

This manual is divided

Based on a decade of research in Indonesia, this book provides an in-depth account of the military's struggle to adapt to the new democratic system after the downfall of

Download File

PDF Manual

Suharto's authoritarian regime in 1998. Unlike other studies of the Indonesian armed forces, which focus exclusively on internal military developments, Mietzner's study emphasizes the importance of conflicts among civilians in

determining the extent of military involvement in political affairs.

Analysing disputes between Indonesia's main Muslim groups, Mietzner argues that their intense rivalry between 1998 and 2004 allowed the military to extend its engagement in politics and protect its institutional interests.

The stabilization of the civilian polity after 2004, in contrast, has led to an increasing marginalization of the armed forces from the power centre.

Drawing broader conclusions from these events for Indonesia's ongoing process of democratic consolidation, the book shows that the

future role of the armed forces in politics will largely depend on the ability of civilian leaders to maintain functioning democratic institutions and procedures.

evolution of India's automotive industry is identified to have occurred in four phases. In the first (1947-1965) and second phase (1966-1979), the important policies identified were related to protection, indigenisation and regulation of the industry. On the one
