How can human beings, who are liable to error, possess knowledge, since the grounds on which we believe do not rule out that we are wrong? Andrea Kern argues that we can disarm this skeptical doubt by conceiving knowledge as an act of a rational capacity. In this book, she develops a metaphysics of the mind as existing through knowledge of itself.

Even though important developments within 20th and 21st century philosophy have widened the scope of epistemology, this has not yet resulted in a systematic meta-epistemological debate about epistemology's aims, methods, and criteria of success. Ideas such as the methodology of reflective equilibrium, the proposal to "naturalize" epistemology, constructivist impulses fuelling the "sociology of scientific knowledge", pragmatist calls for taking into account the practical point of epistemic evaluations, as well as feminist criticism of the abstract and individualist assumptions built into traditional epistemology are widely discussed, but they have not typically resulted in the call for, let alone the construction of, a suitable meta-epistemological framework. This book motivates and elaborates such a new meta-epistemology. It provides a pragmatist, social and functionalist account of epistemic states that offers the conceptual space for revised or even replaced epistemic concepts. This is what it means to "refurbish epistemology": The book assesses conceptual tools in relation to epistemology's functionally defined conceptual space, responsive to both intra-epistemic considerations and political and moral values.

God. A work of exhaustive scholarship written in deep sympathy with the ministry of congregations and church bodies, Christian Faith has inspired admiration and debate from all quarters of the Christian family since its first publication in 1821. This is the first full translation of Schleiermacher's Christian Faith since 1928 and the first English-language critical edition ever. Edited by top Schleiermacher scholars, this edition includes extensive notes that detail changes Schleiermacher made to the text and explain references that may be unfamiliar to contemporary readers. Employing shorter sentences and more careful tracking of vocabulary, the editors have crafted a translation that is significantly easier to read and follow. Anyone who wishes to understand theology in the modern period will find this an indispensable resource.

Our lives today are oppressed by the demand that we live, feel and experience with ever greater intensity. We are enticed to try exotic flavors and smells; urged to enjoy a wide range of sexual experiences; pushed to engage in extreme sports and recreational drugs - all in the pursuit of some new, unheard-of intensity. Tristan Garcia argues that such intensity rarely lives up to its promise. It always comes at a price: one that defines the ethical predicament of contemporary life. The notion of intensity was the hidden key to Garcia's landmark book *Form and Object*. In *The Life Intense*, the first part of his ambitious *Letting Be* trilogy, he begins to develop it in detail. This first book focuses on ethics; the forthcoming volumes will be devoted to politics and then metaphysics.

There is at present no publication specifically dedicated to analyzing the philosophical implications of augmented reality, especially regarding knowledge formation, which constitutes a fundamental trait of knowledge society. That is why this volume includes an analysis of the applications and implications of augmented reality. While applications cover diverse fields like psychopathology and education, implications concern issues as diverse as negative knowledge, group cognition, the internet of things, and ontological issues, among others. In this way, it is intended not only to generate answers, but also, to draw attention to new problems that arise with the diffusion of augmented reality. In order to contemplate these problems from diverse perspectives, the authors are from a variety of fields - philosophy, computer science, education, psychology, and many more. Accordingly, the volume offers varied and interesting contributions which are of interest to professionals from multiple disciplines.

In the immediate centuries after the Romans' destruction of Jerusalem and its Temple in 70 CE, Jews and Christians offered contrasting religious explanations for the razing of the locus of God's presence on earth. Adam Gregerman analyzes the views found in three early Christian texts (Justin's Dialogue with Trypho, Origen's Contra Celsum, and Eusebius' Proof of the Gospel) and one rabbinic text (the Midrash on Lamentations), all of which emerged in the same place--the land of Israel--and around the same time--the first few centuries after 70. The author explores the ways they interpret the destruction in order to prove (in the case of Christians), or make it impossible to disprove (in the case of the Jews) that their community is the people of God. He demonstrates the apologetic and polemical functions of selected explanations, for claims to the covenant made by one community excluded those made by the other.
