Z Corporation was founded in December 1994 by Marina Hatsopoulos, Walter Bornhorst, James Bredt and Tim Anderson, based on a technology developed at MIT under the direction of Professor Ely Sachs. The Company was sold to Contex Holding in August 2005, and was ultimately acquired by 3D Systems on January 3, 2012. ZPrinting relates to the z axis which adds depth to the other 2 axes x,y as does 3D printing. In 1993, a new 3D printing technology, ZPrinting, was developed at the Massachusetts Institu

Z Corporation - Wikipedia

The Z450 produces high-quality prints with an eye-watering range of colors that put standard FDM 3D printers to shame. The printing process is also extremely streamlined due to the arrangement of the chambers and their various dry, vacuum, and print functions. The printer is also very waste conscious and automatically reuses excess powder.

Zcorp 3D Printer Review 2020 - Is This 3D Printer Worth ...

Z Corp. 3D printers use standard inkjet printing technology to create parts layer-by-layer by depositing a liquid binder onto thin layers of powder. Instead of feeding paper under the print heads like a 2D printer, a 3D printer moves the print heads over a bed of powder upon which it prints the cross-sectional data sent from the ZPrint software.

Z Corporation 3D Printing Technology - Polynet

Z Corporation (corporate site) was founded in 1994 in Burlington MA and initially gained an exclusive license for 3DP technology from MIT for the rapid prototyping market. Z Corporation joined Contex Holding A/S group of companies in 2005.

Z Corporation: 3D Printing and the Engineering Office ...

Z Corporation ' s 3D printing technology helps Cisco quickly and inexpensively create the physical models it needs. A 3D printer creates physical objects from 3D computer-aided design data much as a 2D printer creates documents from word-processing text.

Z Corporation 3D printing technology now utilized by Cisco ...

This unique, 24-bit color, 3D printing capability produces color models that accurately reflect your original design data. Color models communicate more information than any other type of rapid prototype, providing you with a strategic advantage in product development. Only Z Corporation ' s 3D printers are capable of printing in multiple colors.

Z Corp Spectrum Z510 3D Printer | eBay

Al Dean takes an in-depth look at the ZPrinter 650, which brings the most recent innovations in high-definition colour and integrated post processing to Z Corporation ' s high-end 3D printing offering for the first time.. Recently, Z Corporation has expanded its 3D printing products to include both high-resolution colour capabilities and facilities for model post processing - such as powder ...

Z Corporation ZPrinter 650 - DEVELOP3D

With its best-in-class speed, ability to print in full color and economical, office friendly use of printing materials, Z Corporation's 3D printing technology is widely used by some of the world's most innovative companies to speed design development in industries ranging from aerospace to footwear.

Z Corporation 3D Printing Technology Involved in the ...

BURLINGTON, Mass., USA - Z Corporation today unveiled the world's first automated, monochrome 3D printer and the company's most affordable automated 3D printer to date, making advanced rapid prototyping technology more accessible to mainstream engineers and architects. Like other Z Corporation 3D printers, the ZPrinter® 350 converts 3D data into physical models much as desktop printers convert word-processing files into physical documents.
