Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

In his thirty years with the National Park Service, Jim Burnett has seen it all: boat ramp mishaps that have sent cars into the water; skunks in the outhouse and bears at the dumpster; visitors looking for the bridge over the Grand Canyon.

It takes more than a single terraformer to start a new world. The human colony on the lost world of Not What We Were Looking For faces fracture and schism. On one side of the river, the settlers from Earth remember what it means to live in a free society. In the Marss-controlled city, the governor cancelled elections long ago and strives daily to cement his grip on the inhabitants. Thaddeus Dawe and the Hudson cousins, including the one who agreed to marry him, save the colony's last terraseeder from the governor's political grandstanding, and head for the secret northern enclave started by Thaddeus' brother. But all Thaddeus' careful planning takes a wrenching turn when not one but two parties race in pursuit. Thwarted in his original goal, faced with repairing the consequences of what he does to escape arrest, and besotted by the discovery of newspapers, Thaddeus wrestles with new ventures and roles in which he dare not fail. He must save not only Earth's microbial legacy but its knowledge base as well. Not to mention, he's getting married. But when the governor's chief of staff decides to weaponize Thaddeus against both the city's farmers and the newspaper's publisher, Thaddeus must fight the governor's attempts to steal the farmers' land even as someone destroys everything Thaddeus himself tries to build. In the end, he must do what he can to save those his own betrayal put at risk. Picking up where Under the Earthline left off, The Gear Engages is the fourth book in the gripping science fiction colonization series Martha's Sons. If you like action, political machinations, and a driven hero, you'll want to dive in heart-and-head first. Pick it up now to join the fight for a lost world!

This densely illustrated, hands-on guide to diesel engine maintenance, troubleshooting, and repair renders its subject more user-friendly than ever before. Finally, boatowners who grew up with gas engines can set aside their fears about tinkering with diesels, which are safer and increasingly more prevalent. As in other volumes in the International Marine Sailboat Library, every step of every procedure is illustrated, so that users can work from the illustrations alone. The troubleshooting charts in the second chapter--probably the most comprehensive ever published--are followed by system-specific chapters, allowing readers to quickly diagnose problems, then turn to the chapter with solutions. Diesel engine systems covered include: mechanical; oil; fresh- and raw-water cooling; low- and high-pressure fuel; exhaust; starting; charging; transmission and stern gear.

The first in a series of highly practical, hands on, step-by-step photographic manuals, Replacing Your Boat's Engine fills a gap in the market for the DIY boat builder and repairer. It is a subject covered only in piecemeal fashion by the yachting press, which, like general boat repair manuals, can't go into the level of detail Mike Westin does. This is a visual, hand-holding guide, dwelling on the practical details of replacing a boat's engine and related systems as it explains each procedure rather than focussing on the theory (which is relegated to an appendix, for those who wish to go further). Anyone who wishes to upgrade their boat's engine or replace an ailing or broken engine will find this step-by-step illustrated book a hand-holding godsend.
